International Telephone Input for Magento®2

Overview

This module integrates the [International Telephone Input](#) JavaScript plugin with Magento 2. It shows country flags for telephone inputs and provides other useful features such as validation, country detection, etc.

Please note, that this module works with the **full international phone number format** only (national mode option is not applicable).

Applicable areas

This extension covers all standard Magento areas containing telephone inputs.

Installation

1. Copy contents of the src directory to the root directory of your Magento installation.
2. Run these commands to enable the module:

```
php bin/magento module:enable Magery_IntlTelInput
```

```
php bin/magento setup:upgrade
```

Enterprise Edition module installation

There is an additional module available for Enterprise/Cloud editions:
Magery_IntlTelInputEe
It can be installed using this commands:

```
php bin/magento module:enable Magery_IntlTelInputEe
php bin/magento setup:upgrade
```

Configuration

Module configuration can be found in admin:
Stores → Configuration → Customers → International Telephone Input

Configuration options:

General

Enabled	Enables module
Allow Dropdown	Display the country dial code next to the selected flag so it's not part of the typed number.
Custom CSS Container	Additional classes to add to the parent div.
Separate Dial Code	Display the country dial code next to the selected flag so it's not part of the typed number.
Use Utils Script	Enables formatting and shows telephone number placeholder (example format for the selected country).
Enable Validation	Enables validation provided by Google's libphonenumber library.

International Telephone Input for Magento®2

Country Settings

Allowed Countries	List of the countries included in the dropdown.
Initial Country Mode	Allows selecting the initial country. Available options: ● None - the first available country will be selected ● Auto - detects the customer's country using IP geolocation lookup ● Configured - allows specifying one country that will be selected by default ● Initial Country Configured Default selected country (if "Initial Country Mode" option is set to "Configured")
Preferred Countries	Specify the countries to appear at the top of the list.

Advanced

Custom Input IDs	This option gives the ability to initialize the plugin for custom fields. Comma-separated list of custom text input IDs. Applies to the following pages: ● Customer Registration ● Customer Account Edit ● Customer Address Registration ● Customer Account Address
